

Chapter 4: Use Case Analysis

Answer to Your Turn 4-1: Campus Housing

Student responses will vary. One example of a set of use cases:

Use Case Name: <u>Apt. Owner adds or deletes apartment</u>		ID: <u>1</u>	Importance Level: High
Primary Actor: <u>Apt. Owner</u>			
Short Description: This use case describes how an apt. owner adds or deletes an apartment from the database of available apartments.			
Trigger: <u>Apt. owner has an apartment available or an apartment becomes unavailable</u>			
Type: External / Temporal			
Major Inputs:		Major Outputs:	
Description	Source	Description	Destination
<u>Apartment owner name</u>	<u>Apt. Owner</u>	<u>Apartment owner name</u>	<u>Apt.DataStore</u>
<u>Apartment address</u>	<u>Apt. Owner</u>	<u>Apartment address</u>	<u>Apt.DataStore</u>
<u>Number of bedrooms</u>	<u>Apt. Owner</u>	<u>Number of bedrooms</u>	<u>Apt.DataStore</u>
<u>Number of bathrooms</u>	<u>Apt. Owner</u>	<u>Number of bathrooms</u>	<u>Apt.DataStore</u>
<u>Monthly rent</u>	<u>Apt. Owner</u>	<u>Monthly rent</u>	<u>Apt.DataStore</u>
<u>Restrictions</u>	<u>Apt. Owner</u>	<u>Restrictions</u>	<u>Apt.DataStore</u>

<p>Major Steps Performed</p> <ol style="list-style-type: none"> 1. Apartment owner contacts service <ol style="list-style-type: none"> 1.1. When apartment become available, <ol style="list-style-type: none"> 1.1.1. Apt. Owner fills out form with appropriate information. 1.1.2. Apartment Information is entered into database. 1.2. When apartment becomes unavailable: <ol style="list-style-type: none"> 1.2.1. Service deletes apartment 	<p>Information for Steps</p> <p>Apartment information</p> <p>Completed Form Apt info (datastore)</p> <p>Request to delete apartment</p>
---	---

Use Case Name: Student Database Search		ID: <u>2</u>	Importance Level: High
Primary Actor: Student			
Short Description: This use case describes how a student searches the database for an apartment			
Trigger: Student decides to search for an apartment			
Type: External / Temporal			
Major Inputs:		Major Outputs:	
Description	Source	Description	Destination
<u>Number of bedrooms</u>	<u>Student</u>	<u>Apartment Found</u>	<u>Student</u>
<u>Number of bathrooms</u>	<u>Student</u>	<u>Apartment address</u>	<u>Student</u>
<u>Monthly rent</u>	<u>Student</u>	<u>Number of bedrooms</u>	<u>Student</u>
<u>Restrictions</u>	<u>Student</u>	<u>Number of bathrooms</u>	<u>Student</u>
		<u>Monthly rent</u>	<u>Student</u>
		<u>Restrictions</u>	<u>Student</u>
		<u>Address</u>	<u>Student</u>
		<u>Owner Contact Info</u>	<u>Student</u>

Major Steps Performed	Information for Steps
<ol style="list-style-type: none"> 1. Student browses to Apartment Search website. 2. Student enters search criteria. 	Website address Student search criteria (bedrooms, bathrooms, rent, restrictions) Search results
<ol style="list-style-type: none"> 3. Student contacts Apartment Owner(s) for selected apartments. 	Search results Apartment Owner contact information

Answer to Your Turn 4-2: Tune Source Digital Music Download

Student responses will vary. The steps for ‘Search and Browse Tunes’, and ‘Purchase Tunes’ are provided in the text. No steps were provided for the ‘Promote Tunes’, so students will have to fill out the steps and the information for the steps.

Use Case Name: <u>Promote Tunes</u>		ID: <u>2</u>	Importance Level: <u>Medium</u>
Primary Actor: <u>Marketing Department Staff</u>			
Short Description: This use case handles the periodic creation of targeted promotions.			
Trigger: Time for marketing department to update current promotion/specials			
Type: <u>External</u> / <u>Temporal</u>			
Major Inputs:		Major Outputs:	
Description	Source	Description	Destination
<u>Customer Favorites</u>	<u>Favorites File</u>	<u>New Web Promotions</u>	<u>Targeted Promotions File</u>
<u>Customer Purchases</u>	<u>Sales File</u>	<u>Promotional Emails</u>	<u>Customer</u>
Major Steps Performed		Information for Steps	
1. Review files of recent additions to customer favorites list.		Favorites File	
2. Review records of recent customer purchases.		Sales File	
3. Create New Web Promotions.		Results of review of Favorites & Sales File New Web Promotions	
4. Create email message to promote to promote sales and specials; send email to customers.		Web Promotions Promotional Email message	

Answer to Concepts in Action 4-A: Building a Bad System?

1. One reason the problems were missed is that customers were not considered as a source of inputs to the system. The agents were certainly documented, but no one realized that the customers might bypass the agents and directly use the system.

2. The analysts or agents might have researched similar sites to determine that customers could indeed use the system directly. The team might have conducted a walk-through with personnel other than agents and analysts, which may have brought the activity to light.
3. Instead of abandoning a system that worked fairly well, the company might have optimized it instead. Recognizing that customers use these types of sites, they might have made this so useful to the customer that the site, and the company name, became known as the best of place to go when searching for a home.

Solutions to End of Chapter Questions

1. *What is the purpose of developing use cases during systems analysis?*

The purpose of a use case is to illustrate the activities that are performed by the users of the system, and is often thought of as an external or functional view of a business process. Use cases are developed during systems analysis activities to help the analysts better understand the situation and simplify later modeling steps in the analysis phase.

2. *How do use cases relate to the requirements stated in the requirements determination?*

A use case describes in more detail the key elements of the requirements definition. Use cases will provide more detail on the processes by which the system is to meet those requirements and the data the system needs to capture and store.

3. *Describe the elements of the use case's basic information section.*

The basic information section includes use case name, number, a brief description, and the trigger for the use case.

4. *What is the purpose of the input and outputs section of the use case?*

The purpose of the inputs and outputs section is to list all inputs and associated sources, and outputs and associated destinations for the proposed system.

5. *What is the purpose of stating the primary actor for the use case?*

The purpose of stating the primary actor is to identify the external entity that initiates the event to which the system responds. The primary actor may be a user, or a system event, or another system.

6. *Why is it important to state the importance level for a use case?*

The importance level of a use case identifies the relative significance of the use case in the overall system. Use cases are classified as high, medium, or low. This classification allows for immediate identification of essential use cases.

7. *What is the distinction between a temporal trigger and an external trigger? Give two examples for each.*

A temporal trigger is based upon the passage of time. Examples are time to pay a bill; library book is due. External triggers are things outside the system to which the system must respond. Examples are a customer placing an order; customer payment is received.

8. *Why do we outline the major steps performed in the use case?*

Steps are outlined in order to determine the sequence of events that must occur to complete the use case. An outline of the sequence of events aids in ensuring that all steps are included.

9. *What is the purpose of an event-response list in the process of developing use cases?*

The purpose of an event-response list is to provide an intermediate step between the requirements definition and use cases. Building an event-response list allows for a review of the requirements definition and associated actions.

10. *Should a use case be prepared for every item on the event-action list? Why or why not?*

Initially, every event on the event-list should be translated into a use case. This results in a tentative set of use cases. Use case development can be viewed as an iterative process, and further analysis may allow the developer to discard or add use cases to the set.

11. *Describe two ways to handle a situation in which there are a large number of use cases.*

One possibility for the large number is that the use cases are not defined at the right level of detail. If the use cases are too 'small' we do not need to bother to create a use case, but simply use the information in the requirements definition itself to build the process and data models. If there really are more than eight or nine major use cases, the use cases are grouped together into packages of related use cases. These packages are then treated as the major processes for the top level of the process model with the use cases appearing on lower levels. The packages could also be treated as separate systems and modeled as separate systems.

12. *What role does iteration play in developing use cases?*

It is best to develop the major use cases and their basic information first so that no major events are forgotten. Then, the inputs and outputs are added and the detailed steps are outlined. As the inputs and outputs associated with each step are identified,

more details may be identified. It is not practical to try and get every detail right the first time through the use case, so we cycle through the steps iteratively until the use case is complete.

13. Describe the best way to validate the content of use cases.

Role-playing can be useful in confirming the validity of the use case. If the users execute the steps of the use cases using the written steps of the use cases as a “script” for actions to take, they will be able to find errors or confirm the correctness of the use cases.

Solutions to End of Chapter Exercises

A. Create a set of use cases for the process of buying glasses from the viewpoint of the patient.

Use Case Description

Use Case Name: <i>See eye doctor</i>		ID: <u>1</u>	Importance Level: High
Primary Actor: Patient			
Short Description: This describes how a patient obtains a prescription for new eyeglasses.			
Trigger: Patient requires new eyeglasses.			
Type: External / Temporal			
Major Inputs:		Major Outputs:	
Description	Source	Description	Destination
_____	_____	_____	_____
_____	_____	_____	_____
_____	_____	_____	_____
_____	_____	_____	_____
Major Steps Performed		Information for Steps	

Use Case Description

Use Case Name: <i>Select and order eyeglasses</i>		ID: <u> 2 </u>	Importance Level: High
Primary Actor: <i>Patient</i>			
Short Description: <i>This describes how a patient chooses and orders new eyeglasses.</i>			
Trigger: <i>Patient has new eyeglass prescription and visits eyeglass store.</i>			
Type: External / Temporal			
Major Inputs:		Major Outputs:	
Description	Source	Description	Destination
_____	_____	_____	_____
_____	_____	_____	_____
_____	_____	_____	_____
_____	_____	_____	_____
_____	_____	_____	_____
Major Steps Performed		Information for Steps	

Use Case Description

Use Case Name: Purchase glasses		ID: <u>3</u>	Importance Level: High
Primary Actor: Patient			
Short Description: This describes how a patient purchases new eyeglasses.			
Trigger: New eyeglasses are ready and patient picks them up and pays for them.			
Type: External / Temporal			
Major Inputs:		Major Outputs:	
Description	Source	Description	Destination
_____	_____	_____	_____
_____	_____	_____	_____
_____	_____	_____	_____
_____	_____	_____	_____
_____	_____	_____	_____
Major Steps Performed		Information for Steps	

B. Create a set of use cases for the following dentist office system...

Use Case Description

Use Case Name: Patient makes or changes an appointment		ID: <u>1</u>	Importance Level: High
Primary Actor: Patient			
Short Description: This describes how a new appointment is made or an existing appointment is changed.			
Trigger: Patient calls to schedule new appointment or change an existing appointment.			
Type: External / Temporal			
Major Inputs:		Major Outputs:	
Description	Source	Description	Destination
_____	_____	_____	_____
_____	_____	_____	_____
_____	_____	_____	_____
_____	_____	_____	_____
_____	_____	_____	_____
Major Steps Performed		Information for Steps	

Use Case Description

Use Case Name: <i>Collect new patient information</i>		ID: <u> 2 </u>	Importance Level: <i>High</i>
Primary Actor: <i>Patient</i>			
Short Description: <i>This describes how new patient information is collected when a new patient arrives for appointment.</i>			
Trigger: <i>New Patient arrives for appointment.</i>			
Type: External / Temporal			
Major Inputs:		Major Outputs:	
Description	Source	Description	Destination
_____	_____	_____	_____
_____	_____	_____	_____
_____	_____	_____	_____
_____	_____	_____	_____
_____	_____	_____	_____
Major Steps Performed		Information for Steps	

Use Case Description

Use Case Name: Send appointment reminder card		ID: <u>3</u>	Importance Level: Medium
Primary Actor: System			
Short Description: This describes how reminder cards are sent to patients two weeks prior to appointment.			
Trigger: Time to send reminders two weeks before scheduled appointments.			
Type: External / <u>Temporal</u>			
Major Inputs:		Major Outputs:	
Description	Source	Description	Destination
_____	_____	_____	_____
_____	_____	_____	_____
_____	_____	_____	_____
_____	_____	_____	_____
_____	_____	_____	_____
Major Steps Performed		Information for Steps	

C. Complete the use cases for the dentist office system in exercise B by identifying the steps and the data flows within the use cases.

Use Case Description

Use Case Name: Patient makes or changes an appointment		ID: <u>1</u>	Importance Level: High
Primary Actor: Patient			
Short Description: This describes how a new appointment is made or an existing appointment is changed.			
Trigger: Patient calls to schedule new appointment or change an existing appointment.			
Type: External / Temporal			
Major Inputs:		Major Outputs:	
Description	Source	Description	Destination
<u>Patient name</u>	<u>Patient</u>	<u>Scheduled appointment</u>	<u>Patient</u>
<u>Desired appointment</u>	<u>Patient</u>	<u>Scheduled appt</u>	<u>Appt file</u>
<u>Appointment to change</u>	<u>Patient</u>	<u>Available appts</u>	<u>Patient</u>
<u>Available appointments</u>	<u>Appointment file</u>	<u>Check Patient name</u>	<u>Patient file</u>
Existing Patients_____	Patient file	_____	_____
_____	_____	_____	_____
Major Steps Performed		Information for Steps	
1. Get patient's name. Check patient name with Patient file.		Patient name Patient File	
2. If new patient, get address and phone number and enter in new patient file entry.		Address Phone number New Patient information	
3. If this is an appointment change, find current appointment in appointment file, and cancel it.		Appointment to change Existing Appointments	
4. Get desired appointment time and match with available appointments in Appointment file. When a suitable time is found, enter scheduled appointment in Appointment file and confirm with patient.		Desired appointment Available appointments Scheduled appointments	

Use Case Description

Use Case Name: <i>Collect new patient information</i>		ID: <u>2</u>	Importance Level: High
Primary Actor: <i>New Patient</i>			
Short Description: This describes how new patient information is collected when a new patient arrives for appointment.			
Trigger: <i>New Patient arrives for appointment.</i>			
Type: External / Temporal			
Major Inputs:		Major Outputs:	
Description	Source	Description	Destination
<u>New Patient information</u> <i>(Includes name, address, Phone number and medical History)</i>	<u>Patient</u>	<u>Patient Information</u>	<u>Patient file</u>
_____	_____	_____	_____
Major Steps Performed		Information for Steps	
<ol style="list-style-type: none"> When the patient arrives, determine if he/she has been seen before in this office. If they have not, have them fill out a patient information form. Use the information on the patient information form to update and complete the patient's entry in the patient file. 		Patient status Patient name Address Phone number Medical history	

Use Case Description

Use Case Name: <u>Send appointment reminder card</u>		ID: <u>3</u>	Importance Level: Medium
Primary Actor: System			
Short Description: This describes how reminder cards are sent to patients two weeks prior to appointment.			
Trigger: Time to send reminders two weeks before scheduled appointments.			
Type: External / <u>Temporal</u>			
Major Inputs:		Major Outputs:	
Description	Source	Description	Destination
<u>Current date</u>	<u>Calendar</u>	<u>Appt notification card</u>	<u>Patient</u>
<u>Scheduled appts</u>	<u>Appt file</u>	_____	_____
<u>Patient Contact Info____</u>	<u>Patient file_</u>	_____	_____
_____	_____	_____	_____
_____	_____	_____	_____
_____	_____	_____	_____
Major Steps Performed		Information for Steps	
1. Each day, find the appointments in the Appointment file for the day two weeks ahead.		Current date Scheduled appointments	
2. Prepare and mail appointment notification card to all patients having appointments.		Name Address Appointment Appt notification card	

D. Create a set of use cases for an online university registration system...

Use Case Description

Use Case Name: <u>Maintain department course offerings</u>		ID: <u>1</u>	Importance Level: High
Primary Actor: <u>Department/Staff</u>			
Short Description: This describes how department staff reviews course offerings, adds new courses, deletes existing courses or changes existing course information.			
Trigger: Departments must prepare upcoming course offerings.			
Type: External / Temporal			
Major Inputs:		Major Outputs:	
Description	Source	Description	Destination
<u>Course offering changes</u>	<u>Department Staff</u>	<u>Updated course offerings</u>	<u>Course offering file</u>
<u>Course offerings</u>	<u>Course offering file</u>	<u>Course offering list</u>	<u>Dept staff</u>
_____	_____	_____	_____
_____	_____	_____	_____
_____	_____	_____	_____
_____	_____	_____	_____
Major Steps Performed		Information for Steps	
1. Department staff requests course offering list for the department. List of course offerings is generated.		Course offering list request Department identifier Course offering list	
2. New course information is entered.		New course information Course offering update	
3. Courses to delete are entered.		Course number to delete Course offering update	
4. Course modifications are entered.		Course number to modify Course changes Course offering update	

Use Case Description

Use Case Name: <i>Maintain student enrollments</i>		ID: <u>2</u>	Importance Level: High
Primary Actor: <i>Student</i>			
Short Description: This describes how students review the listing of courses available for enrollment, add and remove courses from their schedules, and review their schedules.			
Trigger: <i>Student needs to enroll in courses.</i>			
Type: External / Temporal			
Major Inputs:		Major Outputs:	
Description	Source	Description	Destination
<u>Available course request</u>	<u>Student</u>	<u>Avail course list</u>	<u>Student</u>
<u>Available courses</u>	<u>Available course file</u>	<u>Std enrlnmt</u>	<u>Enrlnmt file</u>
<u>Course enrollment request</u>	<u>Student</u>	<u>Student schedule</u>	<u>Student</u>
<u>Fee payment status</u>	<u>Fees file</u>	_____	_____
_____	_____	_____	_____
_____	_____	_____	_____
Major Steps Performed		Information for Steps	
1. Student requests list of available courses. List of available courses is generated.		Available course request Available course list	
2. Student adds course to current schedule. Fee payment status is checked and "total hours enrolled" is checked. If OK, course is added to student schedule.		Course ID, Enrollment request Std enrlnmt Fee payment history Available courses Student Schedule	
3. Student removes course from schedule.		Course ID Enrollment request	
4. Student reviews current scheduled courses.		Student ID Student schedule	

Use Case Description

Use Case Name: <i>Course enrollment reports</i>		ID: <u> 3 </u>	Importance Level: <i>High</i>
Primary Actor: <i>Staff</i>			
Short Description: <i>This describes how department staff prints various reports on courses and enrollments.</i>			
Trigger: <i>Department staff needs information on courses and course enrollments.</i>			
Type: External / Temporal			
Major Inputs:		Major Outputs:	
Description	Source	Description	Destination
<u>Report request</u>	<u>Staff</u>	<u>Report requested</u>	<u>Staff</u>
<u>Course information</u>	<u>Course offerings File</u>	_____	_____
<u>Enrollment information</u>	<u>Enrollment File</u>	_____	_____
_____	_____	_____	_____
_____	_____	_____	_____
_____	_____	_____	_____
Major Steps Performed		Information for Steps	
1. <i>Staff enters report request.</i>		Report request	
2. <i>Requested report is generated.</i>		Course offerings information	
		Enrollment information	
		Report requested	

E. Create a set of use cases for A Real Estate Inc....

Use Case Description

Use Case Name: Maintain house seller information		ID: _1_	Importance Level: High
Primary Actor: Seller			
Short Description: This describes how house sellers enter into a contract to sell and provide information on a house to sell.			
Trigger: House seller wishes to sell house.			
Type: External / Temporal			
Major Inputs:		Major Outputs:	
Description	Source	Description	Destination
<u>Sales Contract</u>	<u>Seller</u>	<u>NewSales Contract</u>	<u>Contract file</u>
<u>House information</u>	<u>Seller</u>	<u>New_House</u>	<u>Offered Houses file</u>
_____	_____	<u>New_House_MLS</u>	<u>Multiple listings file</u>
_____	_____	_____	_____
_____	_____	_____	_____
_____	_____	_____	_____
Major Steps Performed		Information for Steps	
1. Seller signs contract and provides house information.		Sales contract House information (seller)	
2. Offered House database is updated with new listing information.		House information (seller) House information (new AREI listing)	
3. Data on new listing is transmitted to Multiple Listings file.		House information (AREI Offered Houses) House information (new MLS listing)	

Use Case Description

Use Case Name: <i>Generate Buyer's Request</i>		ID: <u>_2_</u>	Importance Level: High
Primary Actor: <i>Buyer</i>			
Short Description: This describes how buyers request and receive information on offered houses.			
Trigger: <i>Buyers request information on available houses.</i>			
Type: External / Temporal			
Major Inputs:		Major Outputs:	
Description	Source	Description	Destination
<u>Buyer information form</u>	<u>Buyer</u>	<u>AvailableHouse info</u>	<u>Buyer</u>
<u>House information request</u>	<u>Buyer</u>	<u>Buyer info</u>	<u>Buyer file</u>
<u>CurrentHouse information</u>	<u>Offered houses file</u>	_____	_____
<u>MLS House information</u>	<u>Multiple listings file</u>	_____	_____
_____	_____	_____	_____
_____	_____	_____	_____
Major Steps Performed		Information for Steps	
1. If buyer requests information on a specific house, retrieve that information from the offered house file.		Buyer specific house search request House request search results	
2. If buyer wants to search for several prospective houses, obtain a buyer information form from buyer. Search offered houses file and Multiple Listing file for houses matching buyers specifications and provide house information to buyer.		Buyer information form Buyer multiple house search request House information search results	

F. Create a set of use cases for a Video Store...

Use Case Description

Use Case Name: Maintain Video inventory		ID: <u>_1_</u>	Importance Level: High
Primary Actor: Video Supplier			
Short Description: This describes how to add and remove videos from video database.			
Trigger: New video arrives or damaged videos are returned by customer.			
Type: External / Temporal			
Major Inputs:		Major Outputs:	
Description	Source	Description	Destination
<u>Video descriptive information</u>	<u>Video Supplier</u>	<u>Video removed from stock</u>	<u>Video file</u>
<u>Damaged video information</u>	<u>Manager</u>	<u>New video to rent</u>	<u>Video file</u>
_____	_____	_____	_____
_____	_____	_____	_____
_____	_____	_____	_____
Major Steps Performed		Information for Steps	
1. When new videos are received, enter video descriptive information into video file.		New video descriptive information AVS video code & descriptive info	
2. When damaged videos are returned, the video entry should be removed from the video file.		Damaged video information AVS video code and delete request	

Use Case Description

Use Case Name: <i>Maintain customer data</i>		ID: <i>_2_</i>	Importance Level: <i>High</i>
Primary Actor: <i>Customer</i>			
Short Description: <i>This describes how customer information is established and overdue fine status is eliminated.</i>			
Trigger: <i>Customer wants to rent a video.</i>			
Type: External / Temporal			
Major Inputs:		Major Outputs:	
Description	Source	Description	Destination
<u>Customer information</u>	<u>Customer</u>	<u>Customer record</u>	<u>Customers file</u>
<u>Overdue/damaged video fee</u>	<u>Customers file</u>	<u>AVS Customer card</u>	<u>Customer</u>
<u>Overdue/damaged fee payment</u>	<u>Customer</u>	<u>Fee payment</u>	<u>Customers file</u>
_____	_____	_____	_____
_____	_____	_____	_____
Major Steps Performed		Information for Steps	
<ol style="list-style-type: none"> 1. When a new customer wants to rent a video, he/she provides customer information. A record is entered into the customer file and the customer is given an AVS customer card. 2. Customer removes overdue/damaged video fee by paying overdue fine. 		<p>Customer information AVS Customer card</p> <p>Customer information Overdue video fee Overdue fee payment</p>	

Use Case Description

Use Case Name: <i>Maintain video rental data</i>		ID: <i>_3_</i>	Importance Level: <i>High</i>
Primary Actor: <i>Customer</i>			
Short Description: <i>This describes how video rentals are entered and returns and overdue videos are recorded.</i>			
Trigger: <i>Videos are rented and returned and become overdue.</i>			
Type: External / Temporal			
Major Inputs:		Major Outputs:	
Description	Source	Description	Destination
<u>Video to rent</u>	<u>Customer</u>	<u>Rented video</u>	<u>Rentals file</u>
<u>AVS card</u>	<u>Customer</u>	<u>Overdue fee assessment</u>	<u>Customer file</u>
<u>Video to return</u>	<u>Customer</u>	<u>Returned video</u>	<u>Rentals file</u>
<u>Overdue video</u>	<u>Customer file</u>	<u>Overdue video notice</u>	<u>Customers</u>
<u>Video information</u>	<u>Video file</u>	_____	_____
<u>Customer data</u>	<u>Customer file</u>		
Major Steps Performed		Information for Steps	
1. <i>Customer selects video to rent and provides AVS customer card. If there are no overdue videos and no unpaid overdue fees, the rental is entered in the rental file.</i>		<i>AVS Customer Card Video to rent Rented video Overdue video fee</i>	
2. <i>Customer returns rented video.</i>		<i>Returned video Current Video rentals</i>	
3. <i>Video becomes overdue. An overdue fee is assessed and added to customer file.</i>		<i>Current date Video due date Overdue fee assessment Overdue video notice</i>	
4. <i>Manager produces report and contacts customers with videos that are two or more days overdue.</i>		<i>Current Date Rented and overdue videos Customer information for overdue rentals</i>	

G. Create a set of use cases for the following health club membership system...

Use Case Description

Use Case Name: Maintain members		ID: <u> 1 </u>	Importance Level: High
Primary Actor: Member			
Short Description: This describes how club records new member information, makes member changes to member information, and removes members.			
Trigger: Need to add, modify, or delete members.			
Type: External / Temporal			
Major Inputs:		Major Outputs:	
Description	Source	Description	Destination
<u>Member information</u>	<u>Member</u>	<u>New member record</u>	<u>Members file</u>
<u>Member information updates</u>	<u>Member</u>	<u>Member updates</u>	<u>Members file</u>
<u>Member to delete</u>	<u>Management</u>	<u>Member to delete</u>	<u>Members file</u>
_____	_____	_____	_____
_____	_____	_____	_____
_____	_____	_____	_____
Major Steps Performed		Information for Steps	
1. New member joins club and provides descriptive member information.		New member information Current membership information	
2. Existing member provides updates to member information.		Member information changes Member information updates Current membership information	
3. Members whose memberships have expired and who will not renew plus members who have died or moved away are removed from member file.		Member to delete Current membership information	

Use Case Description

Use Case Name: Maintain memberships		ID: _2_	Importance Level: High
Primary Actor: Manager			
Short Description: This describes how to record new memberships and process membership renewals.			
Trigger: Need to record memberships and renewals.			
Type: External / Temporal			
Major Inputs:		Major Outputs:	
Description	Source	Description	Destination
<u>New membership details</u>	<u>Manager</u>	<u>Updated Membership record</u>	<u>Membership file</u>
<u>Renewal request</u>	<u>Manager</u>	<u>Renewal offer</u>	<u>Member</u>
<u>Member record</u>	<u>Members file</u>	<u>Renewal details</u>	<u>Manager</u>
<u>Current Membership record</u>	<u>Membership file</u>	_____	_____
<u>Member renewal</u>	<u>Member</u>	_____	_____
Major Steps Performed		Information for Steps	
1. When new membership is established, manager provides details of agreement (length and fee).		Membership details Membership record	
2. Contact members one month prior to membership expiration and offer renewal terms.		Current Date Current membership details Renewal details Renewal offer	
3. Current member renews membership.		Member information Renewal information Membership details	

Use Case Description

Use Case Name: Maintain club usage records		ID: _3_	Importance Level: High
Primary Actor: Member			
Short Description: This describes how to record and report on member usage of the club.			
Trigger: Need to record member visit to club and produce manager's reports.			
Type: External / Temporal			
Major Inputs:		Major Outputs:	
Description	Source	Description	Destination
<u>Member ID</u>	<u>Member</u>	<u>Member visit</u>	<u>Club usage file</u>
<u>Current date</u>	<u>Calendar</u>	<u>Usage report</u>	<u>Manager</u>
<u>Current time</u>	<u>Calendar</u>	_____	_____
<u>Membership record</u>	<u>Membership file</u>	_____	_____
<u>Usage detail update</u>	<u>Club Usage File</u>	_____	_____
Major Steps Performed		Information for Steps	
1. Member checks in when using club. Member ID, time, and date of visit are recorded.		Current Date Current Time Member ID Visit date Visit time	
2. Manager wants report of heavy users and report of inactive members.		Report request Member visit records Member information	

H. Create a set of use cases for the Picnics-R-Us catering system...

Use Case Description

Use Case Name: Establish picnic contracts		ID: _1_	Importance Level: High
Primary Actor: Customer			
Short Description: This describes how customers receive information and book picnics.			
Trigger: Customer needs to establish picnic contract.			
Type: External / Temporal			
Major Inputs:		Major Outputs:	
Description	Source	Description	Destination
<u>Picnic request</u>	<u>Customer</u>	<u>Standard menus</u>	<u>Customer</u>
<u>Standard Menu</u>	<u>Menu file</u>	<u>Special requests</u>	<u>Owner</u>
<u>Special Requests</u>	<u>Customer</u>	<u>Special pricing info</u>	<u>Customer</u>
<u>Special pricing details</u>	<u>Owner</u>	<u>Initial picnic contract</u>	<u>Contract file</u>
<u>Customer Details</u>	<u>Customer</u>	<u>Customer information</u>	<u>Customer file</u>
Major Steps Performed		Information for Steps	
1. Customer calls with picnic request and receives standard menu.		Picnic request Standard menus	
2. Customer has special request and received owner's cost estimate.		Special request Special pricing	
3. Customer decides to book picnic and an unconfirmed picnic contract is recorded in contract file.		Customer details Unconfirmed picnic contract	

Use Case Description

Use Case Name: Maintain picnic contracts		ID: _2_	Importance Level: High
Primary Actor: Contracts			
Short Description: This describes how customer receives contract information and may confirm contract.			
Trigger: Picnic contracts must be communicated to and confirmed by customers.			
Type: External / Temporal			
Major Inputs:		Major Outputs:	
Description	Source	Description	Destination
<u>Potential contract</u>	<u>Contract file</u>	<u>Confirmed/Unconfirmed contracts</u>	<u>Contract file</u>
<u>Signed contract</u>	<u>Customer</u>	<u>Deposit details</u>	<u>Contract file</u>
<u>Contract deposit</u>	<u>Customer</u>	<u>Contracts/customer report</u>	<u>Owner</u>
<u>Report request</u>	<u>Owner</u>	_____	_____
<u>Customer information</u>	<u>Customer file</u>	_____	_____
Major Steps Performed		Information for Steps	
1. Customer is sent contract details.		Unconfirmed picnic contract	
2. Customer returns signed contract with deposit information.		Signed contract Contract deposit information Confirmed picnic contract	
3. Owner requests reports for marketing purposes		Report request Picnic Contracts information Customer information Requested reports	

Use Case Description

Use Case Name: <i>Order supplies</i>		ID: <u>_3_</u>	Importance Level: Medium
Primary Actor: System			
Short Description: This describes how owner reviews upcoming picnics and orders required supplies.			
Trigger: Time to prepare for next weekend's picnics (weekly).			
Type: External / <u>Temporal</u>			
Major Inputs:		Major Outputs:	
Description	Source	Description	Destination
<u>Scheduled picnics</u>	<u>Contracts file</u>	<u>Food/supply requirements</u>	<u>Owner</u>
<u>Menu food/supply needs</u>	<u>Standard menu file</u>	_____	_____
_____	_____	_____	_____
Major Steps Performed		Information for Steps	
1. Identify picnics for upcoming weekend.		Current Date Scheduled Picnics Weekend Picnics	
2. Determine food and supply requirements by reviewing upcoming weekend's picnics, picnic menus, and food/supply inventory.		Weekend Picnics Standard menus Standard menu food and supply needs Food qty-on-hand Supply qty-on-hand	

I. Create a set of use cases for the Of-the-Month-Club...

Use Case Description

Use Case Name: Maintain club memberships		ID: _1_	Importance Level: High
Primary Actor: Customer			
Short Description: This describes how to create, change, and delete members.			
Trigger: Customer wants to enroll in one or more club memberships.			
Type: External / Temporal			
Major Inputs:		Major Outputs:	
Description	Source	Description	Destination
<u>Member information</u>	<u>Member</u>	<u>Member details</u>	<u>Members file</u>
<u>Member updates</u>	<u>Member</u>	<u>Updated member</u>	<u>Members file</u>
<u>Member to delete</u>	<u>Management</u>	<u>Deleted member</u>	<u>Members file</u>
Major Steps Performed		Information for Steps	
1. Customer calls and wishes to establish club membership. Member details are recorded.		New member request Member details	
2. Customer needs to change member details (such as address).		Member information changes Member updates	
3. Remove expired member from the club records.		Member to delete	

Use Case Description

Use Case Name: Maintain memberships		ID: _2_	Importance Level: High
Primary Actor: Member			
Short Description: This describes how to add, renew, or delete memberships.			
Trigger: Customer enrolls in one or more clubs.			
Type: External / Temporal			
Major Inputs:		Major Outputs:	
Description	Source	Description	Destination
<u>Club request</u>	<u>Member</u>	<u>Membership record</u>	<u>Membership file</u>
<u>Club details</u>	<u>Club file</u>	<u>Renewal notice</u>	<u>Member</u>
<u>Club renewal</u>	<u>Member</u>	<u>Renewal membership</u>	<u>Membership file</u>
<u>Club term expiration</u>	<u>Calendar</u>	<u>Membership to delete</u>	<u>Membership file</u>
<u>Club cancellation</u>	<u>Member</u>	<u>Inactive status</u>	<u>Membership file</u>
<u>Membership details</u>	<u>Membership file</u>		
Major Steps Performed		Information for Steps	
1. Member selects one or more clubs to join and membership in the club(s) is established.		Club request Club details Membership record	
2. Member is sent renewal notice when end of club term nears.		Current Date Membership details Club term expiration Renewal notice	
3. Member renews or cancels membership.		Club renewal or cancellation Club details Membership details Renewal membership Membership to delete	
4. Membership expires without being renewed.		Membership details Current Date Inactive membership status	

Use Case Description

Use Case Name: <i>Maintain club</i>		ID: <i>_3_</i>	Importance Level: <i>Medium</i>
Primary Actor: <i>Management</i>			
Short Description: <i>This describes how clubs are added, changed, or deleted.</i>			
Trigger: <i>Management wants to establish, change, or eliminate clubs.</i>			
Type: External / Temporal			
Major Inputs:		Major Outputs:	
Description	Source	Description	Destination
<u>Club details</u>	<u>Management</u>	<u>New club details</u>	<u>Clubs file</u>

<u>Books to remove</u>	<u>Manager</u>	<u>Book to delete</u>	<u>Book holdings</u>
_____	_____	_____	_____
_____	_____	_____	_____
_____	_____	_____	_____
Major Steps Performed		Information for Steps	
1. New books are added to book holdings.		Book details New book entry	
2. Lost or damaged books are removed from book holdings.		Book(s) to remove Book to delete	

Use Case Description

Use Case Name: Process borrowed book		ID: _2_	Importance Level: High
Primary Actor: Borrower			
Short Description: This describes how to check out and return books.			
Trigger: Borrower wishes to check out or return book.			
Type: External / Temporal			
Major Inputs:		Major Outputs:	
Description	Source	Description	Destination
<u>Book to check out</u>	<u>Borrower</u>	<u>Borrowed book info change</u>	<u>Borrowed book file</u>
<u>Borrower ID</u>	<u>Borrower</u>	<u>Returned book info change</u>	<u>Book holdings</u>
<u>Validation information</u>	<u>Valid Borrower file</u>	<u>Overdue status</u>	<u>Overdue file</u>
<u>Overdue book info</u>	<u>Overdue file</u>	_____	_____
<u>Fine due info</u>	<u>Fines file</u>	_____	_____
<u>Returned book</u>	<u>Borrower</u>	_____	_____
<u>Borrowed book info</u>	<u>Borrowed book file</u>	_____	_____
Major Steps Performed		Information for Steps	
<ol style="list-style-type: none"> 1. Borrower presents book(s) to check out. ID is checked for validity against valid borrower file. Overdue books and fines are checked. If OK book is lent to borrower. 		Book to check out Borrower ID Validation information Overdue books info Fines due info Borrowed book info	
<ol style="list-style-type: none"> 2. Borrower returns book. Book is removed from borrowed file and returned to holdings. If overdue, book is removed from overdue file. 		Returned book Borrowed book info Borrowed book info change Returned book info change Overdue file status	

Use Case Description

Use Case Name: <i>Process overdue books.</i>		ID: <u>_3_</u>	Importance Level: High
Primary Actor: <i>System</i>			
Short Description: This describes how to identify overdue books, notify borrower, assess fines.			
Trigger: Book lending term expires.			
Type: External / Temporal			
Major Inputs:		Major Outputs:	
Description	Source	Description	Destination
<u>Lending term</u>	<u>Borrowed book file</u>	<u>Overdue entry</u>	<u>Overdue file</u>
<u>Borrowing details</u>	<u>Borrowed book file</u>	<u>Overdue notice</u>	<u>Borrower</u>
<u>Fine assessment</u>	<u>Manager</u>	<u>Fine entry</u>	<u>Fines file</u>
_____	_____	_____	_____
_____	_____	_____	_____
Major Steps Performed		Information for Steps	
1. Borrowed book lending term expires. Entry is made in overdue file.		Current date Book lending term Overdue status change	
2. Borrowed book is more than two weeks overdue. Fine is assessed.		Borrowing details Fine entry	
3. Every week, overdue book notices are sent to borrowers.		Borrowing details Overdue book notice	
4. Manager specifies fine for lost or damaged book.		Book damage entry Fine entry	

Answers to Textbook Minicases

1. a. *The Analysis phase of systems development has three primary goals: (1) to understand the current system (called the As-Is system); (2) to identify ways to improve the situation; and (3) to develop a conceptual design for the new system (called the To-Be system). To achieve these goals, we will be spending time talking to each of you to learn about how the current system works, the problems you experience, the improvements you'd like to see in the new system, and your ideas for what the new system should be like.*
- b. *To help us understand your business processes, we utilize a tool called a use case. The use case represents the activities that are performed by users of your system and the information needed to accomplish these activities. The use case is prepared from the perspective of the client, and we will be working closely with you and your staff to understand the essential activities of your system. We will meet with you and your staff several times to refine our use cases and to add appropriate details as our understanding of necessary activities and information grows richer. Our use cases will form the foundation of our next steps in analyzing your current system and designing the new system.*

Use cases are used to assist the users to represent the business processes in an informal, verbal way rather than with the formality of data flow diagrams. This technique can be used to help develop process models of both the As-Is and the To-Be systems. Use cases use a three-stage process that develops the information needed to create data flow diagrams. First, the users identify the major activities that the users perform (referred to as use cases). Then the team works through several steps to develop a more detailed outline of the activities performed within each use case and the inputs and outputs needed to perform each step
